# JetFill®

**Premium Inkjet Cartridges**

**JetFill is a recognized brand leader in the inkjet supplies industry. With an established customer base and national distribution, JetFill is an industry-leading provider of remanufactured inkjet cartridges, compatibles and refill systems.**

## REMANUFACTURED INKJET CARTRIDGES

JetFill offers “off the shelf” Remanufactured Cartridges for a variety of inkjet printers. With exacting standards, we disassemble, ultrasonically bathe, clean and reassemble the cartridge to provide a product that will meet our high standards in quality, output and life. After the cleaning process is complete, each cartridge is filled with JetFill’s top quality premium inks using state-of-the-art filling machines specially designed to minimize wear and tear on the cartridges. After the filling process, the cartridges are packed and shipped to our customers. Every cartridge is quality controlled throughout each process to ensure that each printhead is prepared to print like new.

## INKJET REPLACEMENT CARTRIDGES

JetFill’s Premium Inkjet Cartridges are available for most major brands of printers. Built around JetFill’s superior quality ink, each cartridge is precision engineered and carefully crafted to meet our high standards. JetFill chemists use advanced computer technology to test and measure the characteristics of ink to ensure vibrant, accurate color representations based on each printer’s specifications. The plastics are then created by our engineers with exacting guidelines. Each cartridge is tested for quality, consistency and reliability. In many cases, JetFill cartridges provide more ink and greater output than the OEM cartridge. JetFill cartridges provide value to each customer through high quality, consistent output and prices that are significantly lower than the OEM.

## HAND HELD REFILLS

JetFill Cartridge Refills provide the most economical alternative to purchasing a new cartridge. Our refills are designed to provide high quality output while saving the consumer money. By refilling cartridges, the consumer is only buying the ink, not an additional printhead, which is the primary cost of a new cartridge.

## CARTRIDGE RECOVERY PROGRAMS

JetFill helps to meet the needs of the industry and environment through our cartridge recovery programs. This environmental initiative creates “Better Products through Responsible Manufacturing.” Cartridge recovery programs are now in place to suit a variety of needs. Please call 1-800-282-6650 ext. 110 for more information about our Empty Cartridge Collection Programs.
