

# Thermal Fax Ribbons

**B2B Direct offers premium quality Thermal Fax Ribbons! This product provides clear, sharp output, and resists fading and smudging. Ink coatings are thicker which result in better, darker images with less flaking - all at significant cost savings over OEM products.**

- Compatible thermal fax ribbons for all of the popular OEM products - 28 different SKUs covering 10 different brands of thermal fax machines.
- Quality you can count on. Thicker ink coatings result in better, darker, denser images.
- B2B Direct thermal fax ribbons use an inked end mark strip to detect the end of the ribbon. This gives consumers an extra printed page compared to ribbons using a silver-foil end ribbon method.
- B2B facilities are ISO 9002 certified - you can rely on us.
